

EKGaction Learning Series

Build confidence and precision in EKG interpretation.

The EKGaction portfolio, created by **Dr. William A. Schiavone, DO, FACP, FACC**, now offers a comprehensive suite of courses for allied health students and faculty. Dr. Schiavone's case-based teaching method has been successfully used for over 15 years to teach electrocardiography to cardiology fellows. The flagship **EKGaction** program and its introductory course, **The EKG: Learn it well**, provide a strong foundation in EKG science. Two additional courses extend learning to specialized audiences: the **EKG Tech Edition** and the **EMT Edition**.

For EKG Technicians:

The EKG: Learn it well™ EKG TECH EDITION

The EKG: Learn it well – EKG Tech Edition

Designed for EKG Technicians who strive for the best possible tracing. This interactive course builds a strong foundation in EKG science and technique to ensure accurate, high-quality recordings.

- Covers Einthoven's triangle, limb leads, augmented limb leads, and precordial leads
- Demonstrates proper electrode placement, sweep speed, and voltage standardization
- Explains how to determine heart rate and identify common artifacts
- Shows how to detect and correct lead misplacement
- Reinforces learning through review sections and auto-graded quizzes
- Illustrates the organization and rationale behind an optimal EKG tracing

For Emergency Medical Technicians:

The EKG: Learn it well™ EMT EDITION

The EKG: Learn it well – EMT Edition

Created for EMTs who rely on EKGs to assess patients in critical moments. This course teaches how to interpret tracings, recognize life-threatening patterns, and take informed action in the field.

- Builds understanding of EKG fundamentals and electrode placement
- Teaches recognition of lead misplacement and artifacts
- Guides interpretation of rate, rhythm, and arrhythmias
- Covers defibrillation, heart blocks, pacemakers, ICDs, and AEDs
- Explains EKG signs of ischemia, injury, infarction, hyperkalemia, and hypothermia
- Uses clinical scenarios and quizzes to strengthen real-world decision-making
