Osmosis supports your nursing program's goals. Without interfering with your curriculum.

Built on a foundation of evidence-based learning science research, Osmosis’s study tools and comprehensive materials help students:

- **Stay organized**
- **Study more efficiently**
- **Retain information longer**

With Osmosis, you can augment your curricular resources to **better engage your students** in their nursing education. Improve learning outcomes with educational tools that increase collaboration, promote adaptive, self-guided study, and support flipped classrooms.

- Musculoskeletal
- OB/GYN
- Neurology
- Pathology
- Pediatrics
- Physiology
- Psychiatry
- Renal
- Reproductive
- Respiratory
- Surgery

How Osmosis Supports Teaching

Osmosis integrates directly with your LMS to map Osmosis content and resources to your curriculum. So you can make sure the Osmosis platform supports your program’s learning goals by serving up relevant content to faculty and students.

With Osmosis, your faculty can offer continuous low-stakes assessments to students via 1,100+ NCLEX®-style questions. By pairing these assessments with the Osmosis Reporting Dashboard, your faculty are able to spot learning gaps, and your institution will receive an early indication of students who are struggling.

Trusted by Institutions Across the Globe

Osmosis is relied on by 60+ institutions around the world, including nursing programs at UC Irvine, University of Tennessee Health Science Center, and University College Dublin. In addition, Osmosis videos have been watched by more than 21,000 current and future nurses, and the Osmosis learning platform is used by over 680,000 students worldwide.

“Osmosis teaches faculty how today’s health professional students learn to become tomorrow’s health professionals. If you want to remain relevant as an educator — and have fun growing while you do — then I strongly encourage you to engage fully with the teaching and learning power of the Osmosis platform.”

— Dr. Amin Azzam
Clinical Professor at UC Berkeley, UCSF Joint Medical Program
