Primal Pictures Brings You PALMs

Revolutionize the learning of anatomy

Perceptual and Adaptive Learning Modules (PALMs) is scientifically proven to reduce learning time and increase retention while improving faculties’ ability to assess student progress.

Proven to produce better outcomes than traditional learning methods, Anatomy PALMs:

- Optimizes student engagement with a game-like interface
- Adapts to each student’s learning capacity
- Provides assessment tools allowing faculty to pro actively devaluate groups or individuals
- Combines science-based learning with Primal Pictures’ best in class content

“ These modules were tremendously helpful for me. I found it very helpful to see multiple presentations of everything in order to get the broad scope of what I was learning. Additionally, the format of the program was fun and interactive in a way the kept me engaged and while pushing me to improve. ”

PALMs user, David Geffen School of Medicine
