Protocol Builder: A Better Protocol-Writing Tool

Independent Study of Protocol Builder vs. Microsoft Word

- **Protocol Builder Saves Time and Money**
  Users required less assistance to complete the protocols using Protocol Builder, decreasing the cost of providing administrative support to investigators by 85%.

- **Protocol Builder Significantly Improved Protocol Completeness**
  Protocol Builder drove 100% completion of all sections – a dramatic improvement over Word.

* Proof of concept study by Sara Hollis, Education & Compliance Coordinator, GME, Ascension Health, February/March 2018. Study participants included 3 residents, 2 department directors and 1 administrator. Four different templates were tested side by side, tracking user time, admin time, and completeness percentages. All users completed post protocol writing survey for ease of use and recommendations.

Protocol Builder is Easier to Use and Received Strong User Endorsement

Users agreed that Protocol Builder is fairly to significantly easier to use than Word in all areas of protocol writing. Overall, Protocol Builder received a strong endorsement from users.

User Feedback

“Overall, I learned much more about the different types of protocols and the distinctions between them. Protocol Builder provides the correct categories for each template to ensure all that’s needed is included. I did not have an opportunity to use the collaboration feature, but it could be very helpful in tracking changes. Previously this has been a source of frustration with different versions of software that alter comments or changes. I also really liked the formatting feature to produce a professionally formatted document for submission. This reduces the administrative burdens and time needed to format, reformat, and reformat again each time there are changes!”

“It is a step by step process, you are aware of your progress at all times. I liked the quick explanations provided, instructional for each portion, and liked the collaborative ability.”

“Definitely user-friendly for the unexposed uninitiated!”

“It was easier to track changes than in the Word document”

“The program made sure you completed all sections so you were not concerned you missed any.”
