

ADVANCED PRACTICE SERIES™

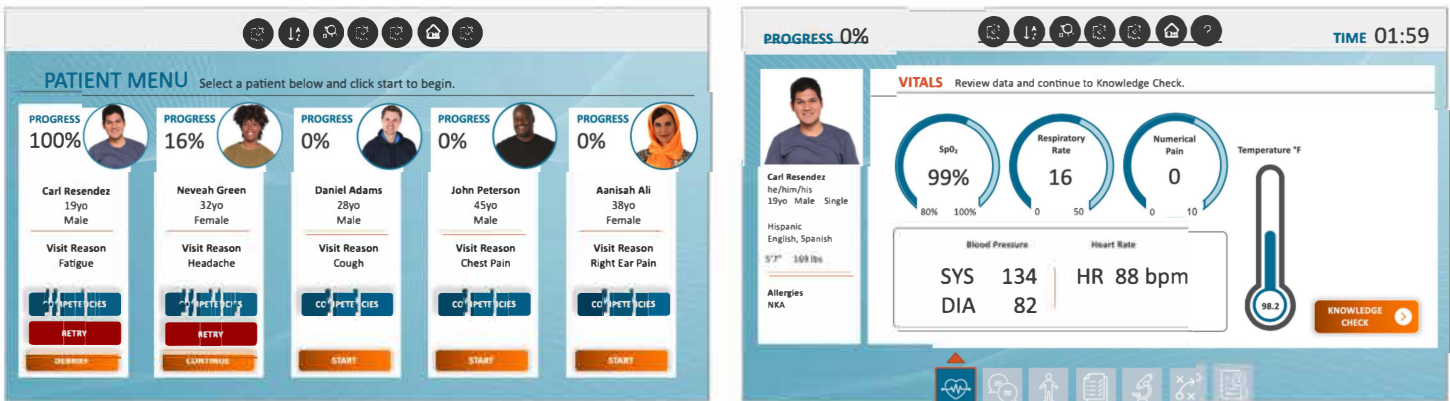

This virtual simulation series prepares advanced practice healthcare providers such as Nurse Practitioners, Physician Assistants/Associates, and medical students by using robust virtual clinical encounters to refine clinical judgment and decision-making skills. Featuring eleven modules, each with five unique patients, your learners will be tasked with:

IDENTIFYING DIAGNOSES • ORGANIZING PLANS OF CARE • CORRECTLY CODING FOR BILLING

This series helps fill organizational gaps left by clinical preceptor demand and limited practice sites, ensuring that your learners are exposed to relevant, true-to-life encounters prior to encountering them in a real-world environment.

ADVANCED PRACTICE SERIES™ VIRTUAL SIMULATIONS

Our Advanced Practice Series Features 11 Modules With 55 Patients:

- › Typical Adult Encounters
- › Complex Adult Encounters
- › Adult Mental Health Encounters
- › Pediatric Mental Health Encounters
- › Typical Pediatric Encounters
- › Complex Pediatric Encounters
- › Cardiac Encounters
- › Oncology Encounters
- › Gerontology Encounters
- › Women’s Health GYN Encounters
- › Women’s Health OB Encounters

In each of our Advanced Practice Series modules, nurses are presented with a variety of scenarios and patients with different conditions to foster critical thinking and build confidence in a clinical setting.

- › Advance through the clinical encounter while reviewing the patient inquiry, H&P and review of systems (ROS) within the EHR
- › Identify differential diagnoses and order corresponding diagnostics
- › Develop comprehensive plan of care
- › Select appropriate billing codes – ICD, CPT, and HCPCS
- › Includes faculty guide, feedback and rationales, and a dashboard with evaluative report, as well as a learner dashboard

Our simulation modules align with industry academic quality standards, including:

- › AACN Essentials for Advanced-Level Nursing Education
- › ACGME Core Competencies for Medical Education
- › National Organization of Nurse Practitioner Faculties (NONPF) Role Specific Competencies
- › Competencies for the PA Profession Adopted by AAPA, ARC-PA, NCCPA, and PAEA
