Expanded Environments and a Diverse Population

- 5 Neighborhoods, Including an All-New Suburban Neighborhood
- 4 Key Informants
- 23 Citizens From a Variety of Backgrounds
- Explore Different Businesses, Neighborhoods, and Services on a New Narrated Bus Tour
- 100+ Sets of Unique and Authentic Data and Demographics
SIMULATION-BASED LEARNING FOR NURSING STUDENTS

Sentinel City® v.5 is the latest update to the award-winning immersive virtual simulation program for community and population health, offering nursing students engaging and authentic learning experiences. This cutting-edge technology is designed to help nursing students develop advanced observation techniques, cultivate critical thinking skills, and confidently make community health assessments in a risk-free learning environment.

Earn Necessary Clinical Hours To Launch Students’ Nursing Careers

While the hours and activities within this immersive platform are almost limitless, many use Sentinel City® to earn up to 30 clinical hours and experience more than 30 assignments, all aligned with QSEN Quality and Safety Competencies, new AACN Essentials®, NLN Core Competencies, and Quad Council Core Competencies.

Enjoy the Variety That Comes With the Assignment Catalog

This virtual city can cover everything from community assessments and infection prevention and control issues to natural disasters and population-focused interventions. Plus, nurse educators have access to a portal featuring comprehensive resources such as an upgraded faculty guide, a new searchable assignment catalog, and grading rubrics to augment and enhance their curriculum.
