

Students Go Beyond the Flashcards to Form a Strong Foundation in Medical Terminology

300+ Picmonics of the Most Need-to-Know Medical Terms

Understanding medical terminology is essential for all healthcare students. The **Picmonic for Medical Terminology Add-On** leverages concise unforgettable stories and characters to actively engage students, allowing them to easily remember and apply the prefixes, roots, and suffixes that combine to form more than **11,000 medical terms**. This program provides the flexibility to teach lessons independently and a clear audio guide for pronunciation, as well as quizzes for tracking student success and remediation. Scientifically proven to set your students up to successfully begin courses and study for exams!

What Students are Saying

“

I am a first-grade teacher who is going back to school! I begin my accelerated BSN program this fall and was looking for ways to make the process a little less stressful. I found Picmonic and I am SO glad that I did! I am learning lots of valuable lab values, medical terminology, and medications before even stepping foot into the classroom. The daily quizzes have allowed me to gain confidence and pick up more material than I thought I would be able to! I highly recommend Picmonic to all nursing students, especially those that are not yet in the medical field, like myself!

- Mackenzie, Nursing Student

”

In this challenging time where we are learning everything online, Picmonic is a MUST for Visual Learners! Desperate for a way to remember and craving a way to understand the Fundamentals, Anatomy & Terminology in PN1, I struggled until I started using Picmonic every day, and I WANT to use Picmonic every day. My test score jumped from the 70s to 90s as soon as I started using it. I am confident I fully understand the material and because I learned it on Picmonic, I can easily recall the pictures, characters, or corny stories, and choose the correct answer. Thank you so much for helping me succeed in this program!

- Lori B., LPN Student
