

HOW-TO GUIDE

EBM UPDATES EMAILED TO YOU DAILY

The STAT!Ref Evidence Alerts system from TDS Health provides email delivery and access to evidence-based medicine (EBM) information from current research of 130+ premier clinical journals. The system works with McMaster University (McMaster PLUS) delivering EBM alerts that are qualified, then rated for clinical relevance and newsworthiness by a panel of practicing physicians.

HOW TO SET-UP

Login to TDS Health as you normally do. Click on the Profile link and login to your account. If you do not already have a Profile account, create one by clicking Register and entering your information.

Click the Alerts tab. Select STAT!Ref Evidence Alerts. Go to the Alert Preferences tab. If you wish to receive emails, click the box next to “Email me when new articles are published” and fill out the profile based on your preferences of relevance, frequency, newsworthiness, category and specialties.

The screenshot shows the TDS Health user interface. At the top, there is a navigation bar with the TDS Health logo, a search bar, and user information including 'Welcome Kate!' and a 'Log Out' button. Below the navigation bar, the 'STAT!Ref EvidenceAlerts' logo is prominently displayed. The main content area is divided into several sections: 'Articles', 'Alert Preferences' (which is highlighted with a blue arrow), and 'RSS Feeds'. Under the 'Alert Preferences' section, there are several settings: a checked checkbox for 'Email me when new articles are published', a dropdown menu for 'Alert Frequency' set to 'Daily', a dropdown menu for 'Minimum Relevance' set to '5', and another dropdown menu for 'Minimum Newsworthiness' set to '5'. There is a '(learn more)' link below these settings. A 'Choose a Category' section follows, with a note that users can select interests in 'Medicine', 'Nursing', and 'Rehab' categories, each represented by a button.

Log off. You are now registered. Please note: those with iOS devices using Safari will need to turn off the “Block Pop-ups” setting before trying to open an Alert sent via email. Additionally anyone else that encounters difficulty opening an Alert should make sure to allow pop-ups from this site in their browser settings.

If you do not wish to receive emails, each time you login to TDS Health go to Profile, login using your Profile username (email) and password and click Alerts under the “Welcome Your Name” drop-down. The articles available based on your criteria are listed in the Articles tab. Or, access the RSS Feeds tab.

If you have any questions, please call 800-901-5494 or email support@tetondata.com.

Evidence Alerts Medicine Disciplines

- Emergency Medicine
- General Practice (GP) / Family Practice (FP)
- GP / FP / Anesthesia
- GP / FP / Obstetrics
- GP / FP / Mental Health
- Occupational and Environmental Health
- Public Health
