

STAT!Ref®

Personalizing a STAT!Ref Subscription

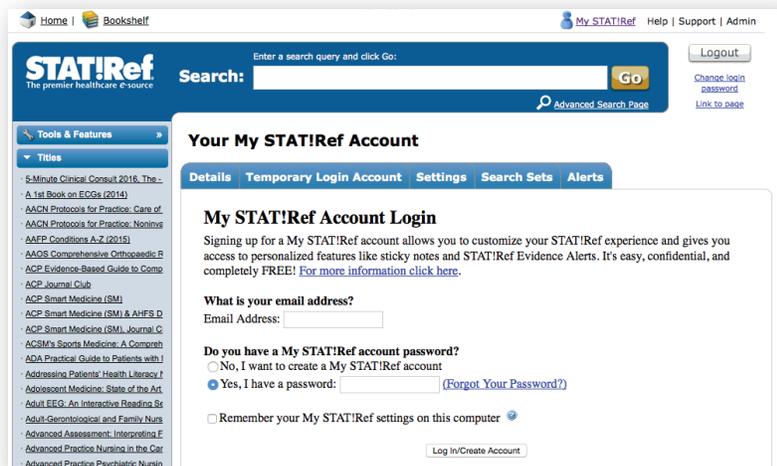

Creating a My STAT!Ref account personalizes your institution's STAT!Ref subscription to make it unique to you. With a My STAT!Ref account, you can create a customized experience with favorite documents or searches, recent searches, mobile access, e-mail alerts and much more.

A My STAT!Ref account allows you to:

- Note favorite documents or searches
- View recent searches and last viewed resources
- Create and manage your own custom search sets
- Create a temporary login account, where you can access STAT!Ref via a username and password anytime and anywhere
- Configure the STAT!Ref Mobile App to your institution's account
- Set-up and maintain Evidence Alerts
- Set-up and maintain Medical News Feed
- Set-up and maintain Essential Evidence Plus Daily POEMs E-mail Alerts
- Change settings such as how search results are seen, font sizes and other elements on the STAT!Ref subscription home page

See the My STAT!Ref account tabs and their functionality on the reverse side.

My STAT!Ref Account Features and Functionality

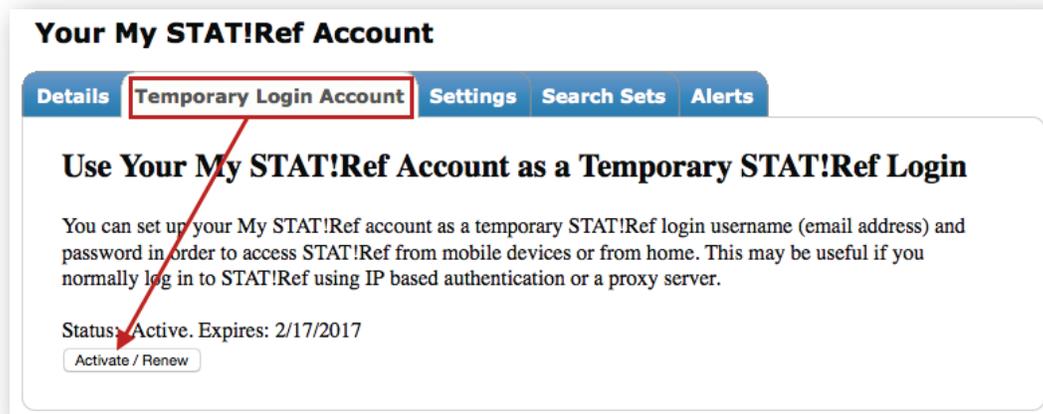

Details

View and edit your My STAT!Ref account using this tab. You can also change your My STAT!Ref password in this tab. Please note: your profile is setup to enable remote access and if you change the listed email address or password, then the new value(s) will also be what you must use for remote access.

Temporary Login Account

Create, activate and renew a Temporary Login Account using this tab. Why Do We Call it a Temporary Login Account? Activating the Temporary Login Account will provide the ability to login to your institutional subscription via a username (email address) and password on your mobile device, remote laptop, tablet, desktop, etc. This account will be the same as a My STAT!Ref account. The My STAT!Ref email address and password become a login account, temporarily. Temporary Login Accounts expire 90 days from initial setup, by default. Your institutions decision maker, in regards to STAT!Ref, can request to make the expiration shorter or longer from 30 days up to 365 days.

Settings

In this tab, choose your default medical dictionary, the url you go to when you logoff of STAT!Ref, how you would like to see the bookshelf tab in your STAT!Ref subscription, determine if you hide or show book covers on the search results page, determine if you show excerpts of results after a search, dictate the font size of STAT!Ref documents, hide or show images on the last searched panel and determine how many search results you would like to see on your page. You can also check a box to always open Figure, Table, and Video links in a new window.

Search Sets

In this tab, My STAT!Ref users have the ability to create their own personal Search Sets for use within the Advanced Search page. The list box labeled "Current Search Sets" is a list containing all of your Search Sets. Initially, this list will be empty, and you will only be able to add a new Search Set. Once you have added Search Sets, you will see them in the Advanced Search page in the "Search by Discipline" drop-down. You can also click here to "Edit My Search Sets."

Alerts

Sign up for STAT!Ref alerts using this tab. STAT!Ref provides alerts which you can sign up to receive via email or by subscribing to the RSS versions of the service. See below for more details.

STAT!Ref Evidence Alerts offer a range of healthcare disciplines that can be chosen delivering relevant and meaningful EBM information focused on your healthcare interests, helping with your clinical decisions. Available via e-mail alerts or via the STAT!Ref Evidence Alerts RSS. Choose alert criteria within Medical, Nursing and Rehabilitation disciplines.

STAT!Ref Medical News Feed, in conjunction with Reuters Health Medical News, keeps health professionals ahead of the curve with the latest key developments in the world of medicine and pharmaceuticals. Available via e-mail alerts or via the STAT!Ref Medical News Feed RSS.

For subscribers of Essential Evidence Plus (EE+), Daily POEMs ("Patient-Oriented Evidence that Matters") are e-mail alert synopses of new evidence carefully filtered for relevance to patient care and evaluated for validity. Daily POEMs emerge from continuous review, grading, and critical appraisal of all 3000+ studies published monthly in more than 100 journals.

*Official login methods are authentication based on the IP addresses of your institution and/or full user accounts. IP authentication is the most popular method of logging in for most institutions since it allows simple links including a group identifier to connect users based on registered IP ranges. That is, without a username and password. It is also the reason that many institutions have proxy servers to allow off-site access.
